

Crossroads

Proud of Our Past. Pride in Our Progress.

Board Names Good Fellowship Ambulance as Primary Emergency Service Provider

As of June 1, 2025, West Whiteland Township's Board of Supervisors will appoint Good Fellowship Ambulance Corps (GFAC) as the community's designated Emergency Service (EMS) Provider. The Board looks forward to continuing its partnership with Good Fellowship.

Underlying this appointment was the Board's goal to consolidate service under one EMS provider. For many years, Uwchlan Ambulance Corps (UAC) and GFAC have been named as co-designated emergency service providers for the Township, with GFAC providing service south of Boot Road and UAC responding to calls north of Boot Road. Both entities and their teams have provided exemplary care and services. The Board thoroughly reviewed various aspects of the emergency medical services, including organizational structure; management; staffing; financial position; current County data; and organizational needs including equipment and facilities, concluding that GFAC has the

resources needed and is well-positioned to service the anticipated future needs of the Township.

West Whiteland Township's Board, staff, residents, and community are grateful for the services provided by Uwchlan Ambulance over the last 50 years. Together with UAC and GFAC, the Township will direct the transition plan from two providers to one.

EMS providers, including UAC and GFAC, provide services for all locations as they are dispatched by the County. Depending on the emergencies happening, EMS providers respond as needed to areas

outside their designated zone to ensure the best services for all in need.

Will there be any change to the quality or type of service provided?

No. Residents and visitors will continue to receive the very best emergency medical services as quickly as possible. Good Fellowship's EMTs and Paramedics are overseen by their organization's Medical Director, Dr. Stephen Carroll. Dr. Carroll is an emergency room physician who started his journey in medicine as a volunteer EMT with Good Fellowship. Additionally, Good Fellowship has a robust clinical

(continued on page 2)

Board Names Good Fellowship Ambulance as Primary EMS Provider

(continued from page 1)

oversight and quality improvement team, reviewing each patient interaction and the care provided. Good Fellowship is known throughout the tristate area as a premier EMS education institution.

What happens if I have a current membership/subscription with Uwchlan Ambulance Corps?

Good Fellowship and Uwchlan Ambulance have a longstanding agreement to honor each other's ambulance memberships/subscriptions.

All existing Uwchlan Ambulance subscriptions in West Whiteland Township will be honored by Good Fellowship until 12/1/2025. **Watch for your 2026 subscription mailer the last week of October!**

Where will Good Fellowship respond from?

GFAC will respond from West Whiteland Fire Company, which will be staffed by Good Fellowship's EMTs and Paramedics 24 hours a day. The Township is working with GFAC to establish a second response location within West Whiteland to be staffed during the busier daytime hours.

More information about Good Fellowship Ambulance can be found on their website or social media platforms: www.GoodFellowship.org, @GFACEMS, and @GoodFellowship.

Online Permitting

All construction permit applications are now online. The online permitting portal allows you to complete residential and commercial construction permits in an easy online form – no need to print or email a paper form or PDF. The online portal will save your progress and allow you to pay online.

For more information on when a construction permit is required, and to submit a permit application, visit our website. Navigate to Services/Permit Applications/Construction Permit Applications.

What Are Impervious Surfaces and Why Do They Matter?

Impervious surfaces are hard, non-porous surfaces like roads, sidewalks, parking lots, and roofs that prevent water from infiltrating into the ground and can lead to increased stormwater runoff and flooding.

You will need to complete an application for a **Stormwater/Grading Permit** if your project's proposed impervious surface exceeds 1,000 square feet or the total site disturbance exceeds 5,000 square feet unless specifically exempted from the Stormwater Management Ordinance.

Putting in a Pool?

If you are considering putting in a pool or hot tub (above ground, inground or inflatable), please reach out to the Codes department to make sure you are following the building code and zoning ordinance safety regulations.

No Open Burning

A reminder that open burning is not permitted in West Whiteland Township. Some fire pits and outdoor fireplaces are allowed. (Outdoor fireplaces require a permit prior to installation.)

CODES CORNER

If you have questions or would like more information, please check our website or email permits@westwhiteland.org for more information.

Oh Deer!

Reporting and removing large dead game animals such as deer will depend on where the animal is located. On a township or private road, call the **Southeast Region PA Game Commission** at 610-926-3136. On a state road call (listed below), call **PennDOT** at 484-340-3200 or report it at www.customercare.penndot.gov.

If the animal is immobile but not deceased, contact the PA State Police by calling 610-584-1250.

For animals on private property, please contact a professional service for private removal.

When are Deer Signs Needed? Deer crossing signs are posted to warn and alert drivers that deer are likely to be crossing the road nearby. The signs indicate habitual and natural crossing

areas for deer, often due to human encroachment in the deer's natural habitat. The deer crossing signs are typically warranted when there's a history of deer-related vehicle accidents in a specific area, or when a significant number of deer are known to cross a road regularly. **The deer have right of way.**

Road Paving

This summer, the following Township roads will be paved:

- Brookhill Road
- Belmont Avenue
- Cardinal Avenue
- Deer Lane
- Bowman Avenue
- Tapestry Circle
- Burgundy Lane

Paving will be completed by a contractor hired by the Township. Work is expected to take place in late July or August.

Questions? Email publicworks@westwhiteland.org.

Report a Concern

If you would like to report a concern or make a service request on a Township road, use the **Citizen Request Tracker** on the homepage of our website. This will send an email to our public works team. Use this feature to make a request regarding the Township parks and facilities, roadways, and sanitary and storm sewers. Find a full list of Township roads on our website.

Recycling Tips

- Rinse your recyclables! This improves the quality of recyclables, ensuring they retain more value once processed.
- Greasy pizza boxes and greasy paper take-out containers belong in the trash.
- Do not put your recyclables in a plastic bag.
- **NEVER** throw batteries in the recycling regardless of the type! Batteries can be recycled at several commercial locations or via mail. Alkaline batteries (AA, AAA, etc.) may go in the trash. Rechargeables do not go in your recycling bin or your trash bin.
- To recycle your electronics, donate them to Goodwill or take them to the Lanchester Landfill and Reclamation Center (LLARC).

If you're uncertain if something is recyclable use the **A-Z list at chestercountyswa.org/163/How-Do-I-Recycle** for composting resources, curbside and drop-off recycling, donations, hazardous waste, electronics, light bulbs, batteries, and more.

An acceptable bulk item is a single item that does not fit into a Township trash bag.

NO

YES

Check our website or email solidwaste@westwhiteland.org if you are unsure if your item will be collected.

Bulk Item Tips

- Bulk items are **single** items that do not fit in a Township trash bag.
- Most electronics will not be accepted as bulk items, with the following exceptions: washers, dryers, and dishwashers.
- Place bulk item on the curb with a sign or label indicating "Bulk".
- Please note, items gathered in a large black trash bag will not be collected as a valid bulk item.
- Check bulk items guidelines on our website to determine if your item is accepted. (Email solidwaste@westwhiteland.org if you need clarification.)

RECHARGEABLE BATTERIES CAN START FIRES!

**DO NOT PUT THEM IN
YOUR TRASH OR
RECYCLING BIN!**

**TAKE THEM TO A HOUSEHOLD HAZARDOUS WASTE EVENT
OR VISIT [CALL2RECYCLE.ORG](https://www.call2recycle.org) TO FIND A DROP-OFF
LOCATION CLOSEST TO YOU.**

[chestercountyswa.org](https://www.chestercountyswa.org)

Trash and Recycling Collection

With rising prices and service concerns regarding waste collection over the last several years, West Whiteland Township has been taking a close look at the options that will best serve our community.

In 2024 and again earlier this year, staff collected bids from area haulers to service the current Pay-As-You-Throw (PAYT) households. At their meeting on April 9, the Board of Supervisors (BOS) awarded a three-year contract to AJ Blosenski, whose current contract expires December 31, 2025.

While the BOS is well aware of the frustrations with the level of service from AJ Blosenski, their bid was significantly lower than the other one received, and the new contract provides the Township with additional time to continue evaluating the option of bringing waste collection in-house. If the Township is ready to move forward with providing trash and recycling services in-house, the contract does allow the Township to terminate services prior to the end of the three-year period.

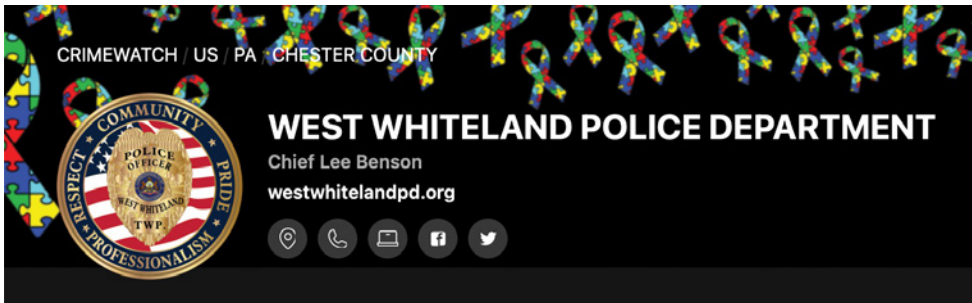

Township staff is working closely with AJ Blosenski to avoid and address missed collections. The BOS has accepted the bid that they feel best meets community needs and is most cost effective. However, industry costs have risen substantially (up to 80%), and the annual recycling fee has remained steady at \$89 since 2021. That fee is calculated as the amount needed to recover the cost of recycling and yard debris collection services and is no longer providing sufficient funds.

In our experience, the top reason for missed collections of trash, recycling, and yard debris has been the hauler arriving before items have been placed at the curb. Please have all items at the curb by 6 a.m. Timing of routes is subject to change, and the hauler is not obligated to return for items that were not at the curb on time. We recommend putting items at the curb the night before.

Residents can expect an increase in the sewer, trash, and recycling fees in 2026 to cover the costs.

If you have questions regarding trash and recycling collection, please email solidwaste@westwhiteland.org.

Get Active in Community Safety

The West Whiteland Township Police Department encourages you to subscribe to CrimeWatch online or download the CrimeWatch app and follow West Whiteland Police Department.

CrimeWatch is an online community safety platform that empowers individuals and organizations by breaking down the barriers to information sharing. Uniting the efforts of law enforcement, children's advocacy groups, concerned citizens, and the business community, CrimeWatch is a central location for information and resources pertaining to crime fighting

and prevention, including the following:

- Detailed listings of offender information and Crime Mapping to build public awareness
- Community Engagement opportunities, such as Coffee with a Cop
- Requests for service, such as vacation home checks, solicitors' permits, and accident reports
- Resources to report child abuse or request aging services, among others

Prevent Mail Theft

How to Protect Yourself

Every day, the U.S. Postal Service delivers millions of checks, money orders, credit cards, and other valuable items. Unfortunately, these items of value are also attractive to thieves. Here are a few tips to protect your mail from being stolen:

- Never send cash or coins in the mail. Use checks or money orders.
- Promptly remove mail from your mailbox after delivery, especially if you're expecting checks, credit cards, or other negotiable items. If you won't be home when the items are expected, ask a trusted friend or neighbor to pick up your mail.
- Have your local post office hold your mail while you're on vacation or absent from your home for a long period of time.
- If you don't receive a check or other valuable mail you're expecting, contact the issuing agency immediately.
- Always deposit your mail in a mail slot at your local post office, or hand it to your letter carrier.
- Consider starting a neighborhood watch program. By exchanging work and vacation schedules with trusted friends and neighbors, you can watch each other's mailboxes (as well as homes).

If you observe a mail thief at work, call West Whiteland Township Police Department at 610-592-5100, and then call the U.S. Postal Inspection Service at 877-876-2455.

What Are They Building Now?

Valley Creek Homes: In March 2025, the Board of Supervisors granted final plan approval to The McKee Group to build an active adult community with 317 dwellings on a 100-acre tract adjacent to Malvern Hunt along the north side of Swedesford Rd. The new community will include townhouses, twin homes, and single-family homes along with a community center, permanent open space, and other amenities. The property had previously been approved for 1.2 million square feet of office space in eleven buildings.

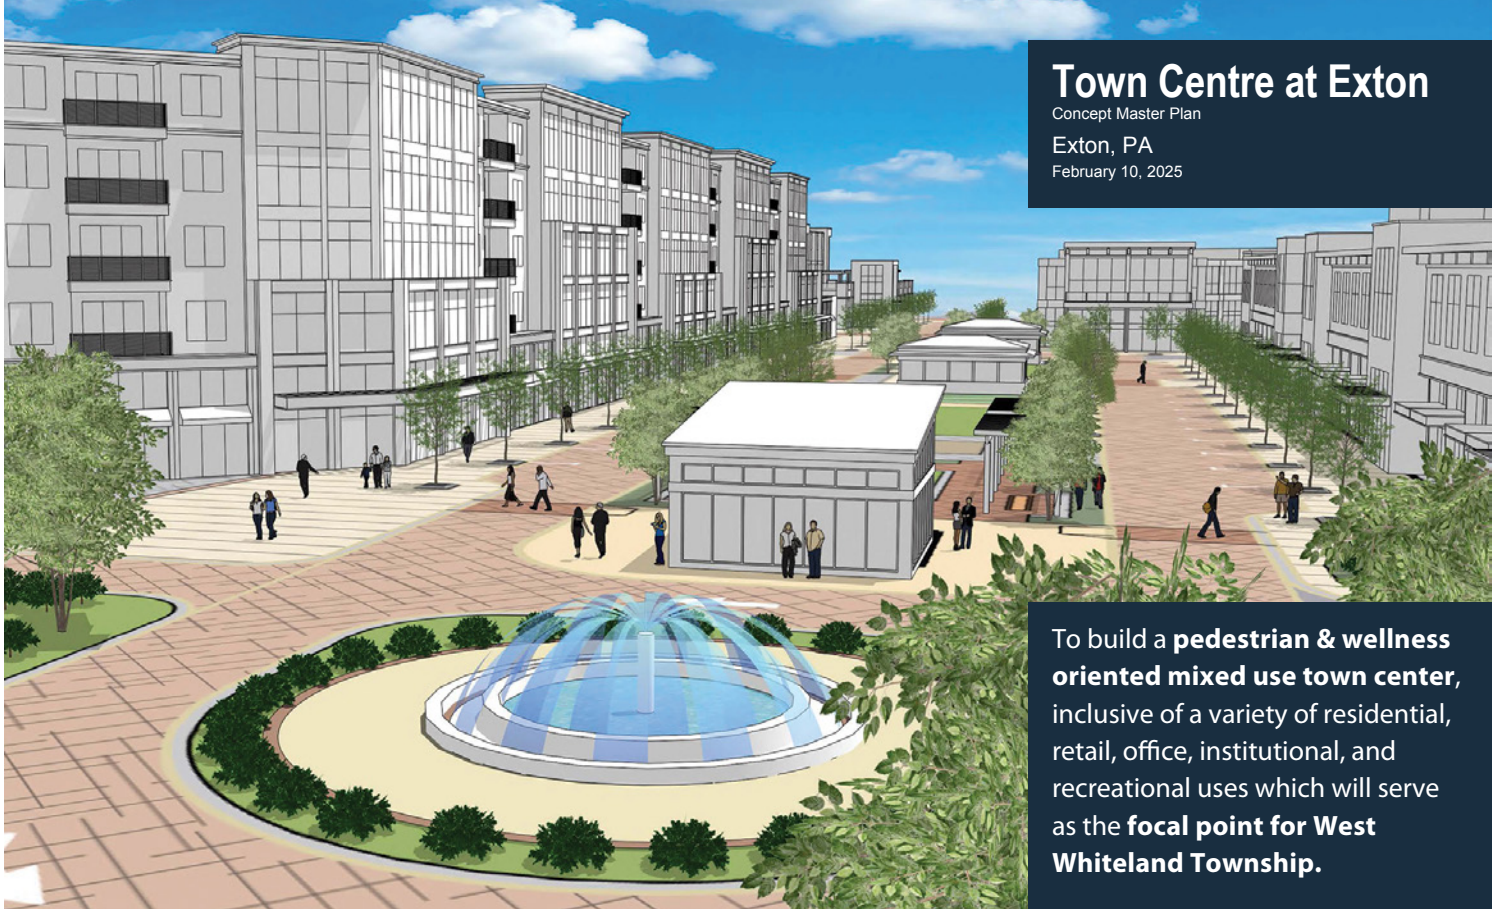

Fred Beans: Fred Beans has recently acquired the Whitford Hills Auto property on S. Whitford Rd. and will be enlarging the existing building and constructing

a new service building. The plans were approved in February 2025 and include a commitment by the developer to renovate and re-use the historic structure along Whitford Rd. and to build a bicycle and pedestrian path along the road frontage. Construction is expected to begin later this year.

Exton Square: Abrams Realty and Development submitted a Master Plan for the redevelopment of the Exton Square mall site in February 2025. The Plan shows that Boscov's and the parking garage across from the Library will both remain, but the rest of the mall structure will be replaced by a mixed-use development to include a new location for Main Line Health, 146,673 square feet

of new commercial space, 48,905 square feet of new office space, over 600 dwellings in a combination of apartments and townhouses, and additional green space. This is just the beginning of the review process, so these numbers are likely to change, and construction will not begin for some time yet, but this remains an exciting project that will have a once-in-a-generation impact on the Township.

For information about development projects in the Township, see the website at www.westwhiteland.org. Navigate to "What Are They Building Now" under the "Community" tab, or check the Planning Commission and Board of Supervisors meeting agendas.

Town Centre at Exton
 Concept Master Plan
 Exton, PA
 February 10, 2025

To build a **pedestrian & wellness oriented mixed use town center**, inclusive of a variety of residential, retail, office, institutional, and recreational uses which will serve as the **focal point for West Whiteland Township.**

Controlling Development: What Can the Township Do?

We Planned for That!

The Township’s planning strategy, Development by Design, calls for a thriving commercial center around the Exton Crossroads (the intersection of routes 30 and 100) with a mixture of uses, including apartments and retail. Surrounding that center are mature residential neighborhoods of single-family homes, with parks and open space throughout.

Planning ahead to promote Exton as a prosperous commercial center benefits our residents. As Exton thrives, the Township is better able to preserve our existing neighborhoods, provide

quality services, make significant road improvements, and maintain the conveniences that residents here enjoy.

Meanwhile, the Township has plans in place that ensure developers pay for traffic and pedestrian improvements, open space preservation and historical property restoration, to the extent that their construction impacts these elements.

To learn more about development in the Township, visit our website at westwhiteland.org/351/Development-by-Design.

THE TOWNSHIP CAN* ...
Control the location of different kinds of development, by designating certain categories like “residential,” “retail sales,” “office,” “restaurant,” etc.
Control density by requiring some minimum lot size per use or building.
Limit the ways environmentally-sensitive land (like flood-prone areas and steep slopes) can be developed.
Require stormwater management to control runoff generated from the proposed development on that site.
Control the placement of buildings by requiring some minimum distance from the street and neighboring lots.
Limit the height of buildings.
Limit how much of a lot can be covered by paving and buildings.
Require developers to set aside permanent open space - or pay a fee instead.
Require landscaping and other buffering to minimize the impact of a new development upon existing development.
Require developers to address at least some of the effects of traffic that will be created by their projects.
Encourage preservation of historic resources.
Require new development to provide sidewalks.

THE TOWNSHIP CANNOT* ...
Prevent a specific company from locating in the Township if the regulations allow the use.
Say that we have enough of some use and prevent more from being built if land zoned for that use is available.
Deny approval of a project that complies with all applicable regulations, even if the community objects to the development.
Deny approval of a project that does not control runoff generated from other properties around that site.
Control the timing of development.
Dictate an architectural style or the use of specific building materials.
Regulate utilities (including pipelines) that are already regulated by the Public Utility Commission.
Enforce regulations that contradict state or federal law.
Deny approval because a project will generate additional traffic.
Require preservation of historic resources.
Change regulations to affect a development after the plans have been submitted.

*As per state regulations

Capital Projects

Clover Mill Pump Station

Work progresses on the rehabilitation of the Clover Mill Pump Station and is expected to be completed in 2025.

Built in 1970, the waste station handles approximately 2.4 million gallons of sewage a day. With the last upgrades occurring in 2006, the facility was due for an overhaul, including the installation of new pumps, motors, valves, and electrical controls and panels, as well as drop gates to block and divert flows during maintenance operations.

This has been a multi-year project, beginning in 2023. Phase One included the installation of the following new equipment: generator and automatic transfer switch, pump controls, HVAC,

wiring, outlets, lights, and switches. Additionally, all electric components and controls were elevated for flooding.

In Phase Two, new wet well steps, force main connection, wet well stop gates, and bar screen were installed, as well as hoist systems in the wet well, dry well, and outside to service equipment. The remaining work to be completed includes the installation of new pumps and motors, piping in the dry well, grinders, and a flow meter.

The total cost of the rehabilitation project is estimated to be \$5.5 million. This was offset by a grant of \$964 thousand by State Senator Comitta’s office in March

2023. To fund a capital project fiscally such as the pump station, a combination of strategic investments and careful savings is key. This project marks an investment to the commitment to excellent service for West Whiteland Township and will benefit the community for many years to come.

Other Capital Projects

PROJECT	DESCRIPTION & CURRENT STATUS	NEXT STEPS
Exton Park Phase II	Playground, stage green, picnic pavilions, restrooms, trails, parking, and signage near the existing multi-use fields	Construction: Summer/Fall 2025
Ship & Lincoln Intersection Improvements	Replacement of mast arms and controller. Design is under review with PennDOT. Partial funding from PennDOT Green-Light-Go grant	Bidding and Construction: Summer/Fall 2025
PA 100 Third Northbound Lane	PennDOT is funding and making improvements on PA 100 (Pottstown Pk.) between the Exton Train Station and the Exton Bypass in the form of a third northbound lane and sidewalk on the west side of PA 100.	Public meeting planned in July/August 2025. Construction: Spring 2027.
Ship Road Bridge Replacement	Existing bridge to be replaced with a larger concrete culvert and sidewalk located on the west side of bridge connecting to the Chester Valley Trail to the South.	Construction: Spring 2026

Please note: all timing is proposed, based on current information. For more information on these projects, please check our website or email Justin Smiley at jsmiley@westwhiteland.org.

Stormwater Management Improvement Projects

As a result of the increase in large rain events, numerous resident inquiries regarding flooding, and aging stormwater infrastructure, West Whiteland Township formed a Stormwater Task Force in January 2024. The goal of the Stormwater Task Force was to prioritize and recommend to the Board of Supervisors stormwater improvement projects throughout the Township.

We encourage our residents with stormwater management concerns to attend the monthly Stormwater Task Force meeting held on the third Wednesday of each month from 5-6 p.m.

Recently, the Stormwater Task Force worked together with the Public Works Department and Township Engineering Consultant to discuss and prioritize a variety of stormwater management improvement projects to complete over the next five years. The committee presented these items to the Board of Supervisors at their meeting on March 12, 2025. Moving forward, the Township plans to budget and implement \$300,000 - \$500,000 per year into Township-owned stormwater facilities and aging infrastructure.

The first budgeted project is the Burgoyne Road Embankment Improvements Project. In July of 2023, a large rain event washed out the embankment along Burgoyne Road (south of 1445 Burgoyne Road). As a result, part of the street washed out and the existing guiderail on site was left hanging in the air. The Public Works Department made a temporary emergency repair to ensure Burgoyne Road remained open to the public. Upon further site investigation of this embankment failure, it was found there is

also a failing timber retaining wall, which supports Burgoyne Road. While the temporary repair has held up for more than a year, permanent stabilization is necessary to ensure the long-term lifespan of Burgoyne Road.

The Township has authorized this repair at an estimated cost of \$500,000. The

project is currently being designed with construction anticipated to occur in the Spring of 2026.

If you have questions about this project or would like more information about the prioritization of stormwater improvement projects in the Township, please email engineering@westwhiteland.org.

Survey Says...We Asked and You Answered!

The Township is in the process of updating its Comprehensive Plan, which will guide important policies and decisions pertaining to growth and (re)development over the next ten years.

General & Resident Information

- Nearly all respondents were between 30 and 79 years of age.
- Respondents from all areas of the Township with a wide range of tenures.
- Vast majority of respondents are owners of single-family homes.

The Comprehensive Plan is a living document that needs to be refreshed periodically to reflect population shifts, economic changes, technological advancements, and evolving public needs. Areas of focus include land use, stormwater, transportation, housing, community facilities, and historic resources.

was conducted from October 1, 2024 to February 1, 2025, and received nearly 2,000 responses from Township residents and business owners. Most respondents were single-family homeowners, and 57% have lived in the Township for over 20 years. Overall, respondents are satisfied with Township services, with the most significant dissatisfaction (27%) existing

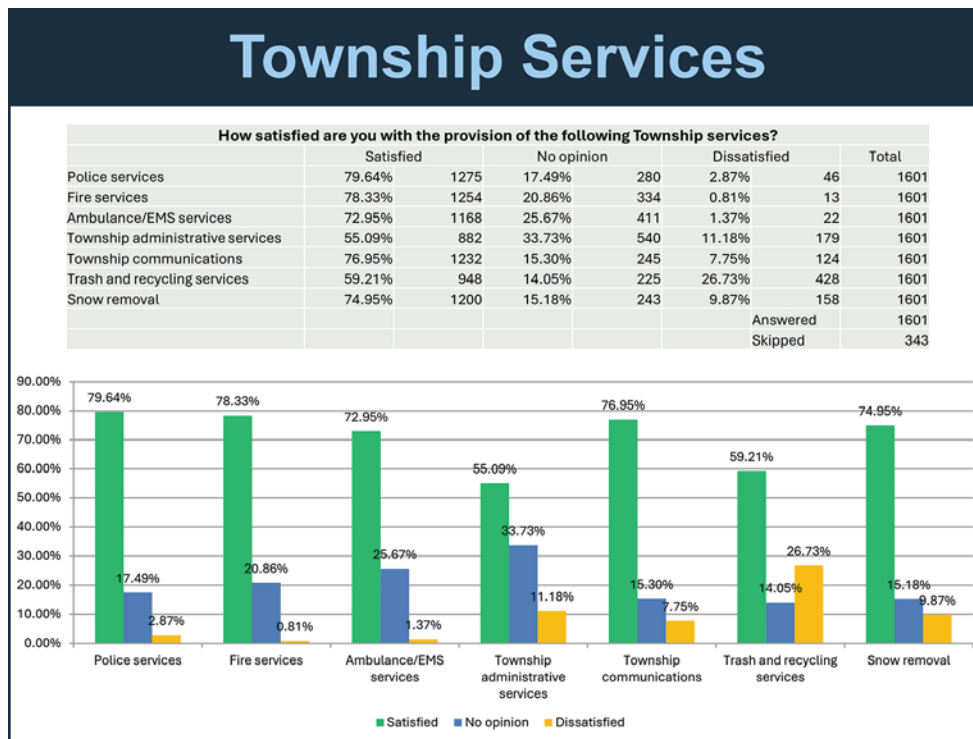

around trash and recycling services. In the areas of natural resources, it seems that residents see an opportunity for more focus on open space; meanwhile, residents responded favorably to recreation and bicycling opportunities, events, pathways, and trails.

To help guide the Plan, a public survey

Transportation and road maintenance are important to the vast majority of respondents, as are resource preservation efforts. There is a perception that the Township does not need any more housing; conversely, most support the positive redevelopment of existing commercial areas and the reimagining of business and office parks.

Based on the survey results, roughly one-third of residents would support increasing taxes to fund service improvements, specifically in the realm of emergency service, stormwater management, and public parks and safe biking and walking paths.

To review the full presentation of survey results, or to share your opinions with the Comprehensive Plan Task Force, visit the Township website or email Justin Smiley at jsmiley@westwhiteland.org.

West Whiteland Designated as a Bird Town

Have you seen these signs? They will be popping up in West Whiteland Township soon!

West Whiteland Township is proud to announce that we have been designated as a Bird Town, through the Pennsylvania Audubon Council. Bird Town Pennsylvania works in partnership with municipalities to promote community-based conservation actions to **create a healthier, more sustainable environment for birds, wildlife, and people.**

To achieve Bird Town status, townships must demonstrate their commitment not only to birds but also to the community. To get started, staff has assembled a Bird

Town committee to organize community programs and events, undertake habitat restoration projects, install bird boxes, conduct educational workshops, and review Township ordinances to ensure that both residents and wildlife benefit from the most sustainable environment possible.

Making our environment more bird friendly also reduces the impact of storm water, beautifies our open spaces, and creates spaces for wildlife and people to come together. Learn more on our website.
